EPA does not have a specific guidance for shelter in place... our LEPC handbook does talk about it...

On our Region 6 LEPC webpage, we have several examples of shelter-in-place brochures issued by local communities for their citizens, as well as the American Red Cross and FEMA guidance on shelter-in-place...

We got this question on shelter in place. Is there such a guidebook? Is this LEPC-related?

thanks,

. I'm working on a story about shelter in place and what it means when one is put in place. My understanding is that local jurisdictions make these decisions but that the EPA does put out a guidebook that helps in that process.
